SUMMARY

3+ years shipping production backend systems at JaaGa.AI using Node.js, AWS, and MongoDB. Owns payments (Cashfree webhooks, retries, reconciliation), automation, OCR/Lambda document pipelines, WhatsApp notifications, and backend/AWS behind www.jaaga.ai. Strong focus on idempotency, observability, and on-call reliability. Open to Backend, Platform, or DevOps roles.

EXPERIENCE

Software Engineer

JaaGa.AI | Hyderabad, India | Apr 2026 - Present (promoted)

- Own backend services for payments, automation, and notifications: API design, data modeling, deployment, monitoring, on-call.
- Built and operate backend and AWS for www.jaaga.ai (e.g. Lambda, S3, integrations, deployment/ops) alongside core products.
- Architected payment retry + reconciliation; reduced failure rate from 2.8% to 0.3% across 10K+ monthly transactions.
- Write and maintain runbooks; first-line on-call; blameless post-mortems with clear follow-ups.
- Partner with finance, ops, product, and legal to turn business asks into shippable specs.

Backend Developer

JaaGa.AI | Hyderabad, India | Apr 2024 - Apr 2026

- Shipped production services on AWS, MongoDB, and Node.js handling INR 50L+ monthly payment volume.
- Integrated Cashfree end-to-end: checkout, webhook verification, idempotent retries with backoff, reconciliation.
- Built WhatsApp notification service with template fallbacks and queue-backed retries (~98.5% delivery at peak).
- Tuned MongoDB indexes/aggregations and Node.js hot paths to reduce latency under load.

Backend Developer Intern

JaaGa.AI | Hyderabad, India | Oct 2023 - Mar 2024

- Delivered REST APIs with Node.js, Express, and MongoDB; production-facing features within the first 3 months.
- Schemas, validation, and queries for new modules; deployment discipline and real incident debugging.
- Converted to full-time based on ownership on lawyer-document and billing modules.

SELECTED PROJECT IMPACT (PRODUCTION)

- Payments platform: ~99.7% success rate; robust webhook handling and reconciliation.
- Lawyer document pipeline: S3 -> Lambda OCR -> MongoDB with PM2 workers and retries; strong OCR accuracy, reduced manual work.
- Property document automation: templating, Google Sheets integration, PDF generation to S3.
- Internal notification/webhook platforms with reliable delivery at scale.

TECHNICAL SKILLS

Languages & runtime: JavaScript, Node.js | Frameworks: Express.js | Data: MongoDB (modeling, indexing, aggregations) | Cloud & ops: AWS (Lambda, S3, EC2), Docker, CI/CD, PM2 | Integrations: Cashfree, REST APIs, webhooks | Practices: idempotency, retries, observability, incident response | Tools: Git, Bash/Linux.

EDUCATION

Master of Computer Applications (MCA) | Osmania University, Hyderabad | 2025 - 2027

CERTIFICATIONS & LEARNING

Introduction to Databases | AI Fundamentals | Build Your Own Responsive Website | Build Your Own Static Website | AI for Brainstorming and Planning
